

DYNA-SPARK

This information was generated by Gold Director Rowan Emrys, C.N.M.T., an independent distributor for DYNAMITE® Specialty Products. The views expressed herein do not necessarily reflect those of DYNAMITE® MARKETING, Inc. No claims are expressed or implied, and this information is not intended to diagnose, prescribe or cure.

Introduced in August of 2002 as an electrolyte for endurance horses, **Dyna-Spark** has proven to be one of those incredible products that work on all species equally well and for far more than Jim Zamzow anticipated!

How do we love thee, **Dyna-Spark**, let me count the ways:

- Encourages horses to eat and drink when on the road instead of avoiding it due to stress
- Encourages drinking water if horse is hesitant to due to smell, excessive heat, cold, etc.
- Brings debilitated horses back very quickly—they “spark” up almost immediately . . . and much, much more!

Here are just a few reports from **DynaSpark** users:

- One rep says that *“One of my customers just returned from an endurance ride in central Florida and used **DynaSpark** for the first time. The vet at the race said the horse had the best gut sounds of any horse in the race!”*
- Another states *“And--let me tell you about **DynaSpark** (the new horse electrolyte) for Dogs--Yes, I said dogs. I've had all 3 of ours on it ---1 capful twice a day--since September 1st. Roxie, our 15 year old was very stiff and she had long wide weepy lines coming from the front corner of her eyes. In 4 days I noticed a difference. The lines are now 1/3 the length and size that they were. The gray around her muzzle is less. Her coat is sleeker. And---though still very arthritic in her walk--she walks easier and occasionally with her old bounce. Annie, our 13 year old Golden Retriever, is less sluggish. Her coat has become more golden in color. As for Jenny, the Weimaraner, the coat is sleeker, and darker, and she has a more "round bodied" look. The boundless energy is even MORE boundless!!”*
- A long-distance trucker customer says *“That one ounce of **Elixir** and ½ teaspoon **DynaSpark** in 64 oz. of water has made a different man of me on these long hauls from eastern Kansas to CO! I'm alert without being buzzed like I was on the coffee, tea and pop and go longer between stops. I even have my Dad and some friends on it, too. It's making these long hay harvest days bearable without that same exhaustion. Thanks so much!!”*
- Another Distributor said they used the **DynaSpark** on a weekend “three day Quarter Horse Circuit.” The weather was warm and windy and the ground at this facility was very deep. They followed the label instructions and noticed a huge difference in hydration and overall energy levels. One reiner is a sweaty adrenal type and the owner thought the amounts worked just right for her and her daughter's pleasure/showmanship/trail horse (fondly referred to as “Coma Face” because he is so flat calm) actually had a bit more spark than he needed at the end of the third day. While he did absolutely fabulously, she thinks she'll try an ounce a day for two days before the event, and a bit more only on the second day to see how that works.
- A Texas Director took on a very sick TB race mare, both very debilitated (high white blood count, anemic, under-

active thyroid, ulcers and emaciated) as well as dehydrated. As soon as the **DynaSpark** arrived, she gave “Rosie” 1 oz in her evening meal (she was being fed 5 times a day with **PGR** and **Dynamite Regular**) and was pleasantly surprised the next morning when she came running around the barn and actually squealed at the prospect of being fed—definitely a first! She gave her another ounce that day and since then she steadily improved. She thinks that **DynaSpark** has a place in everyone's tool kit, not just for the dehydration associated with the performance horses, but also with animals that are debilitated since she noticed a distinct improvement in Rosie's eating (which was almost forced) as well as drinking after getting her on the **DynaSpark**.

- And a barrel horse named “Frank” had been doing very well on the **DYNAMITE**® products for over 2.5 yrs. except that when he went off to a several day barrel race and a number of rodeos in a row, he would not be very interested in eating and drinking and would get pretty drawn looking. The owner gave the new **DynaSpark** to him at 2 oz. the day before she left to attend the barrel races/rodeos, and then 1 oz. a day while she was gone. Frank now has a definite “spark” in both his actions and looks since he finally ate and drank very, very well while performing in some “horrible” Texas heat/humidity.
- A 60-something CO Distributor went through a rather nasty healing crisis, lost way too many pounds she could not afford to lose, and had been nauseous and unable to keep either food or water down very long. When she came over to get some supplements, we were positively shocked at her appearance and gave her a few sample ounces from our opened **DynaSpark**. She called within 30 minutes of getting home and was ecstatic at the fact that for the first time in 3 weeks, after only 1 teaspoon of the product, she had no nausea, was able to keep water down, and was actually feeling hungry!
- Another CO Distributor, a 50-something little tiny woman, is extremely environmentally sensitive. The recent fires with the resultant air particulates and slurry bombing had sent her into a prolonged bout of diarrhea which nothing, not even the **Miracle Clay**, was controlling. Gave her a few sample ounces of **DynaSpark**. She started with 30 drops per day and within hours, the bout started “cooling” off and within just a few days, she was finally normal again with the amount of product taken lessening each day. She's now on a 3-4 drop dose daily for “prevention” and plans on using **DynaSpark** as her electrolyte when she goes on her extended vacation hikes in the future.
- And Beverly Gray, Champion Endurance Rider says, *“What changes did I notice with **DynaSpark**? Definitely improved performance, rapid recovery at each check station, excellent hydration, sustained energy and incredible healthy appetite as well as drinking volumes of water...”*

THIS IS AN AMAZING MULTI-SPECIES PRODUCT which we think belongs in every single barn and home at all times. ■
