

# HERBAL GREEN

This information was generated by Gold Director Rowan Emrys, C.N.M.T., an independent distributor for DYNAMITE® Specialty Products. The views expressed herein do not necessarily reflect those of DYNAMITE® MARKETING, Inc. No claims are expressed or implied, and this information is not intended to diagnose, prescribe or cure.

**T**his product is a great alkalizer. We talk so frequently of the necessity of a slightly alkaline pH and this blend of herbs, *alfalfa & barley* juices plus *yucca baccata* and American ginseng, is one way to begin reaching that goal.

Jim Zamzow, Founder and President of **DYNAMITE® MARKETING, INC.** says of **Herbal Green** capsules for Humans (all **Herbal Green**, whether for humans, horses or dogs, is the same thing, but it is made into capsules for ease of ingestion for humans): *"... you will recognize a common theme on body pH that in order to remain healthy, eat 75% alkalizing foods such as fresh fruits & vegetables and only small amounts of acid producing foods such as meats, dairy products & most grains. If we fail to do this, then the body will remove the alkali minerals, (primarily calcium), from the bone to neutralize these acids, the result being degenerative disease. While we know this to be the truth - it is sometimes difficult to maintain this type of diet when we are traveling or during the winter season in some locations. This is one reason DYNAMITE® offers HERBAL GREEN. This product contains spray-dried alfalfa juice using a special cool method which helps preserve the natural enzymes, minerals & amino acids. Each capsule contains the extracted nutrients of several ounces of alfalfa. Our source of alfalfa is central Utah in an area that was once the bed of the ancient Lake Bonneville. This 'organic' farm raises some of the richest alfalfa & barley in the world. To balance the nutrients in the formula, we have added the finest yucca (30%), Rumex Hymenosepaulos Torr, (American Indian Ginseng) and spray-dried barley juice.*

Alfalfa and barley juices are great sources of *chlorophyll*, a noted blood cleanser and blood builder very similar to hemoglobin in its action.

The concentrated chlorophyll can be especially useful for flushing the kidneys. The need for this can be indicated by a sore back just about where the saddle ends on a horse or mid-back for humans.

*Yucca* and *Ginseng* are herbs believed to have "adaptogenic" qualities. *Yucca* contains *saponins* which act as natural, plant-based steroids and the American ginseng can help to balance adrenals stimulating those which are sluggish, and slightly depressing those which are overactive. It is a less intense herb than Chinese ginseng which can be easily overused.

**Herbal Green** is favored by many distributors as a Spring Tonic while waiting for green feeds to grow. Endurance riders and owners of field trial or coursing dogs love this one as a 3 or 4 day "pre race/event boost." When you see your dog "grazing" on your lawn, add some **Herbal Green** to his diet.

For those times when it is impossible to juice those "green drinks" or eat as many vegetables as required for optimum health, **Herbal Green** can serve as a substitute.

And a **DYNAMITE®** chiropractor noted that: *"One of my patients, a Distributor, has been participating in a Bone Loss study at U of W, taking the recommended drugs and being tested periodically. We had her start taking Elixir, Herbal Green and PMS, and on her next visit to the U, she was the only one in the study group who had halted her bone loss. When she told them that she had not done anything they had told her to do, and had instead embarked on a new nutritional program, they booted her from the study! Not even interested in knowing what worked..... how sad. But not for her! A great demo that addressing pH has a huge sparing effect on bone density and calcium absorption. Note that she was not even taking 'calcium' per se."*

FOR SUPERIOR "GREENS" do consider **Herbal Green** for all. It is available loose in 1# or 4oz. jars or as a 180/capsule bottle. ■
