**D**ue to its concentration, this very powerful blood builder (**Super Stress** with other nutrients added) should be used following directions explicitly and should be used *only in addition to the Basic Program*.

Give only three consecutive days prior to event: 6 oz./180 gm AM and PM, in a moistened feed.

It should *not* be used with **Hiscorbadyne** or **SuperStress** as ingredients would be duplicated. Also, it should *never* be used with any other blood builders!

Although designed originally for the straight race track, it has become a big favorite of endurance riders, including Beverly Gray with Hall of Fame Endurance Horse AA Omner, and 1998 Tevis Cup Champion Potato Richardson and Fille Cailana. They say it seems to really kick in after a mile or so.

FOR THAT EXTRA ENERGY needed in high level competition, this product may be the way to go for your horse. ■
