Brought into the **DYNAMITE®** line-up in 2002 as a 20th anniversary special for race horses, **TNT (The Nutritional Treatment)** became so popular so quickly for so many additional uses, that it now is considered an absolute necessity by many. In fact whole barns, whether breeding or training, have gone over to it for its superior results and ease of use. Amounts can be adjusted according to both size and use of horse. While the suggested dose is 1½ cups per day, some geriatrics are doing superbly on only ⅔ cup per day; some very large warmbloods in heavy use can require up to 2 cups per day for optimum results. It should be added to the **BASIC PROGRAM** instead of the **Regular** or **Plus**.

This black-colored pellet contains an incredible array of specialty products for optimum bio-availability, ease of preparation and taste acceptance. Each suggested serving (1½ C) of **TNT** contains:

- 1 oz **DYNAMITE® Regular** vitamins/minerals
- 20 gms **Free & Easy™** joint nutrients
- 1 oz **Easy Boy™** magnesium for muscles & nerves
- 1/2 oz **Izmine™** trace minerals
- 1/2 tsp **Excel™** digestive tract nutrients
- 1 cup **HES™** Pellets protein & calories

TNT has proven invaluable for:

- Competitive horses on the road—no more messy, time-consuming “baggies” or separate buckets
- Boarding & training stables—easier for *them* to feed what *you* want
- Grainless horses with laminitis, founder, EPSM, insulin resistance, etc.
- Young futurity horses requiring extra support for increasingly high demands
- Lactating mares, sales preparation, growth and geriatric needs and much, much more

Additionally individuals have discovered they are saving about fifty cents per day over separate ingredients

Here is a tiny fraction of what people are saying about **TNT**:

- According to Laura, there was a 26 year old gelding that was scheduled to be put down because he couldn't get up; the owners were actually using a tractor to help him. They decided to try the **TNT** as a last ditch effort and she said the customer told her “*he bolted up the driveway and he did this little...He bucked! I had a colt on my hands. I haven't seen him do this in 4 yrs. We cried.*” Also, an old arthritic mare who refused to budge a month ago is totally without a limp on the **TNT**. “*We haven't seen her this good in years.*”

- We just heard from a downline about 18 yr. old Morgan gelding “Nibbs” who had not been himself for over 8 months; no longer ran during turnout and refused to canter for his owner. In less than one week on the **TNT**, Nibbs cantered with his owner for a few minutes and apparently is starting to run again during turn-out!

- Another gal says she tried, as she usually does with the horses' feedstuffs, the **TNT** on herself and “*Within minutes, I*

felt all my internal organs get really happy and a warm glow was felt throughout all of them. I felt my energy field expand. Then my head noticed what was going on and went ‘ahhhh, this is good!’ It was such a feeling. It lasted the whole day. Didn't matter what went right or wrong, I was just in this great space. This has gone on for a week, I like the feeling so much, I grab a handful when I do the horse's grain. I'll stop when my body says stop, but I personally love this stuff! It explains what I have been seeing in my driving horses, they have had a similar vibe.” She also said that her “mini that had a tired coat at the end of last year is dappling in under a week on **TNT**. She's a hot little number, and likes 4 ounces.”

- from a gal and her barrel horse: “*I love TNT! My horse Tommy has always looked good on DYNAMITE® products, now looks even better on TNT and is running harder than he ever has. Even beat [a World Champ] horse twice recently!*” She feeds it with a little extra **HES** and **PGR**.

- another gal says “. . . my husband and I decided to try the **TNT**. Wow! In less than a week she was moving better. I opened her stall door one morning to [see] a smile on her face. She even moved with ease. I brought her outside to show my husband. She took off running and bucking. Last week our farrier came and could not believe the difference in her. She had no hesitation in lifting her legs and standing there while he worked on her. He is a difficult sell on new products, but was impressed with what he saw. The best part is she eats it all-no waste and it is so easy to feed. We even took her off the **MSM**. She gets **PGR** and **TNT** plus a little **DynaPro**. I know this sounds funny, but I just wish you could see the difference in her expression since **TNT**. She is her old self! Thanks, **DYNAMITE®!!**”

- a Senior Director in TX happily says, “*I had the pleasure of watching one of my TNT horses win a local barrel race with 70+ entries this past weekend. This horse has been doing extremely well since getting on the TNT. People are asking this girl what her horse is on . . . Apparently the gal that won . . . has been telling people who have been asking that the horse is on TNT so I have been getting a lot of interest in the product. Her horse looks great and is running extremely well and smooth, and is calmer than before. This gal used to be rather hit and miss about giving this horse the indicated DYNAMITE® products but loves the TNT because it is all right there - no fuss, no muss! . . . she is giving [just] 1 cup and then giving more on the days she runs. Seems to be working fine though - mare is on her 2nd container of it and Emma has had quite a month - has won about \$1600 near as I can recall. She also uses the **Miracle Clay** (internally when needed as well as externally to draw out the heat after running) and she uses the **Release** and **Relax** as well. This mare is . . . a thoroughbred type and is a little high strung. She will drop her head though using only a small amount of **Relax**. Amazing!”*

TNT can be used, if necessary, with **PGR**, **DynaHoof**, **BreederPac**, **Hiscorbadyne**, **SOD**, **PreRace Pac**, and even top-dressed with a little extra **Regular**. Many horses do not eat as many free-choice minerals while on the **TNT**.

WE ARE ABSOLUTELY THRILLED with all the positive results we have observed and heard of since **TNT** came into being! ■
