

Introducing Dynamite's

OxÉ Mega

- Stalled or dry-lot horses
- Geriatric horses
- All Competition horses
- Stressed horses
- Lactating Broodmares
- & Other Animals

People are raving about OxÉ Mega!

- Judy's laminitic mare is moving a hundred times better after just 3 days.
- Tracie's "gimper" is loping around.
- Terri said her older Weimaraner is playing harder than she has for years.
- Many are saying coats are stupendous on it, as well, with better & deeper color.
- Competitors are using it to "finish" off their halter & performance horses.

OxE Mega Powder Contains:

Chia seeds - This ancient Aztec grain:

- Contains more than 60% Omega-3 fatty acids making it the highest plant source of Omega-3 fatty acids on the planet.
- At 19-23% protein by weight, it is a complete source of dietary protein, providing all the essential amino acids.
- Can absorb more than nine times its volume in water or other liquid thus prolonging hydration and retaining electrolytes.
- Helps to ensure electrolyte dispersion across cell membranes, maintains fluid balances, and aids normal cellular function.
- Contains not only Vitamin C, ferulates and Vitamin E but Cinnamic acids that guard the omega-3 oils from oxidation making it stable for years.
- Grown without pesticides or toxicants.
- Has a high energy to weight ratio making it a favorite choice of long distance runners and other athletes.
- Helpful in preventing or controlling blood sugar levels because the gel it forms tends to slow digestion and sustain balanced blood sugar levels.
- Facilitates the growth and regeneration of tissue during pregnancy and lactation.
- Aids the regeneration of muscles for conditioning athletes.

Vitamin E - an antioxidant important for:

- Circulation
- Tissue repair
- Improving athletic performance
- Eye health
- ... and preventing the lipid peroxidation and formation of free radicals.

Ester C & Citrus Bioflavonoids -

- Aids in producing anti stress hormones.
- Enhances both immunity and collagen & capillary integrity.
- Protects against abnormal blood clotting

and bruising.

- Highly successful as a joint supplement.
- New evidence indicates that vitamin C and E work synergistically to eliminate free radicals.

Dynamite SOD - a super oxide dismutase-enhancing mineral supplement of copper, zinc and manganese amino acid chelates helps to:

- Maintain proper vitamin E levels in the blood.
- Aid in protein synthesis and collagen formation.
- Promote a healthy immune system.
- Support formation of bone, hemoglobin, and red blood cells and formation of elastin.
- Encourage the healing process, energy production, hair and skin coloring.
- Support protein and fat metabolism, healthy nerves, healthy immune system and blood sugar regulation.
- Maintain a healthy reproductive system.

DIRECTIONS (for 1000# horse; adjust for body weight)

Maintenance	1/2-1 scoop/day (= 500-1000 IU of vitamin E)
Stress/Training	2 scoops/day divided into morning & evening feedings
For Correct Vitamin/Mineral Balance	OxE Mega must be fed with at least 1 oz Dynamite Original Formula OR 1 1/3 cup dose TNT. With Dynamite Plus, add 1/2 oz of Dynamite Original & feed only 1/2 oz level of OxE Mega

AVAILABLE: 2# container = 30+ scoops
