

Exciting Testimonials!!

DYNAMITE® DOES Make a Difference

Totally Tomatoes!

"I've used your product for years on trees, but this year I gave Humi-Zyme™ Plus a try on my garden, too! I stand 6'3" and my tomatoes (behind me) are at least 9' tall. The habañero peppers weren't too bad either! I can't wait to see the results year after year as my soil rejuvenates!"

Chris Novak, Customer, ID

Stop unwanted bugs and pests the natural way!
Don't forget to order your Dyna-Shield™ .

Four weeks ago it seemed like my lilacs were not going to leaf out much less bloom. My mountain area (Drake, CO) has been in a serious drought pattern so all water has been scarce for 5 years now (little to spare for watering!), so I put the snow we had on the trees and threw my dishwater on them all winter to try to help them.

Four weeks ago I started adding DYNAMITE® Prescription Treatment Home & Garden Formula to that twice a day. It was still too early to get the hose out and spray as we were still having freezing nights. This week has been a challenge because it went from mild spring to the 98° heat of high summer!!!! In spite of the fact that the lilacs have really been challenged, mine are doing far better with many more blooms than any other bushes in the neighborhood. I will continue to support them with what water I can give them plus spraying some when weather and water availability permit—both of course containing the DYNAMITE® Home & Garden. I know I will have lilac blooms much longer than the rest of the area.

I really like the Dynamite Home & Garden for my mountain property because it helps everything I use it on and I can throw it on when I cannot spray.
