

DYNAMITE® RESULTS!

Summertime calls for

DYNAMITE®!

From Rowan Emrys, Bronze Director,
Fort Collins, CO

We simply could not live without this incredible DYNAMITE® product line!

The **All Natural Shampoo** is the ONLY cleanser we use on hair, face, bodies and even wounds; because of its concentration, it dilutes down to a really cost-effective level and absolutely no toxins anywhere in sight. The matching **Conditioner** also makes a great skin moisturizer, especially if a bit of oil is added. Of course the **Tan-O-the-Isles** works as a marvelous skin conditioner, too, for dry or mature skin at any time of year, but it keeps John's skin more supple in the summer sun than when he forgets it.

We drink the **Catalyst Water** daily along with our **Elixir™**. Although we do not, some of our downline add the **Catalyst Water** to their horse water tanks, especially in summer when the algae can become so problematic. Sort of miraculously clears everything up! And for those who add Koi to their tanks, the **Catalyst Water** is super for them, too! Along with our **Elixir™/Catalyst Water** combo, we have found the addition of about 1 teaspoon of **DynaSpark™** per 64 oz jug of our mixed "Miracle Water" is especially helpful in the summer heat (we take the risk of consuming non-human grade products). John simply does not fatigue even working through the hottest days. Of course we do stick to its original use as a horse electrolyte and have seen it make enormous differences in some rescue horses. They were able to recover, get that DYNAMITE® sparkle in their eyes and gain weight far faster than before. As for me, I go ahead and add **Vitality™** each day, which gives me the extra phytochemicals my system seems to require; it can really bring me out of my occasional wipe-outs.

DynaShield™ is a necessity with our summer flies and mosquitoes for both humans and some of our horses; we found it to work better than anything else we have tried in the natural possibilities. I keep an empty **Release™** bottle filled with the **DS** mix

in my bathroom to spray on me during the day. Our mosquitoes do some fancy dive-bombing techniques, and I am really allergic to them.

The **DYNAMITE® Melaleuca Oil** (Tea Tree) with its ideal cineol:terpinen ratio is one of John's favorites for his feet and it makes an absolutely fabulous wound spray when mixed with olive oil...we've seen it reverse severe tissue necrosis and used it when our gelding skinned his cannon down into the bone; he made a perfect recovery within 3 months.

I use the **Miracle Clay** weekly as a facial masque and we take a bit internally if we have over-indulged at the table. Our daughter used it as a poultice on a very nasty black widow bite and the huge swelling and discoloration were gone by the next day. It has also worked wonders on some client horses with severe diarrhea and ulcers. Once the **Clay** did its thing, we followed up with an **Excel™** cleanse. In fact, all our animals get their daily **Excel™**.

Relax™ has proven a savior for Eric our GSD, who is terrified of thunderstorms and for helping anyone in times of stress. You would probably have to tie me up to take my last **Release™!** That is our first 'first-aid' for simply everything. I use it many times a day for my computer eyes as it gets the red out immediately...yes, it goes right into my eyes. Takes care of both tension and sinus headaches; we use it on acupressure points for massage; reduced pain and swelling on John's badly sprained ankle almost immediately; spray it on 'nervy' muscles when my PPS kicks up; use it on my face every morning before my cream goes on and every afternoon for a quick lift; etc, etc....could probably go on all day about Release! The **Tranquil™** spray stops virtually all my muscle spasms (I have Post Polio Syndrome) and makes a super 'sleeping pill' if necessary and has lessened the need for large amounts anesthesia during gelding procedures.

Solace™ is a colloidal silver preparation almost miraculous in its properties, too. While a neti pot used daily with a pinch of **NTM Salt™** keeps most sinus stuff away, every once in a

while it helps to add some **Solace™** in there if something feels like it's beginning. We also use it for all animals and humans alike in lieu of almost all antibiotics both topically and internally. It and **Trace Minerals Concentrate** are absolute mainstays in our medicine chest. Not only does the **TMC** stop bleeding on various wounds, it also takes care of insect bites (the ones who chomp if we have forgotten the **DynaShield™**) and even the few 'cold sore' eruptions that still show up occasionally. Taken internally at the very first sign of being at all out of sorts, it just sort of energizes the system so no symptoms of anything appear.

It is my belief that the **Wound Balm™** is misnamed because it works on so much more than wounds! John and I use it nightly on hands and feet and I also use it as a night cream for my 60 yr old face. My massage therapist, when not using the **Tan-O-the-Isles** on me as a massage lotion, uses the **Balm** on congested areas with great results. When John sprained his ankle so badly, between the **Release™** and the **Balm™**, he was able to walk in 3 days and it virtually negated all scarring on RC's badly injured cannon. John carries the **Wound Salve™** around the farm to slap on all sorts of little nicks and scrapes that seem to be a part of farm life.

As I said in the beginning, we simply could not live without these terrific products. Thanks DYNAMITE®!
