## ALL NATURAL SHAMPOO

Jim Zamzow says that he set out years ago looking for a product that was.....

1. All natural
2. More effective than any other
3. Harmless
4. Free from human or animal sourced ingredients
5. A value to customers.

.....and this is it!

- This shampoo contains ONLY: Melaleuca Alternifolia, Aloe, Coconut Oil, Salicylic Acid, Avocado Oil, and Shea Butter (all human-grade ingredients).
- Dr. Clark in her book *A Cure For All Cancers* says to dispose of all those products [that contain *methyls, propyls, glycols* or other alcohols] in a toxic waste depository because that is what they are. She says anything that contains *propyl alcohol* is cancer-causing.
- Author Vida France in her article “Poisons In Our Bodies” says *Sodium Laurel* (or Laureth/TEA) *Sulfate*, the foaming agent in shampoos and toothpastes, is extremely corrosive. Some researchers use it to irritate skin before they test healing ingredients. Because SLS cleans so harshly, skin and hair become dry. So, manufacturers use *propylene glycol* to “grease-down” the skin and hair.
- *Propylene glycol* is also used in antifreeze and brake fluid, to make them slippery. SLS can get down inside the hair follicle and plug it, causing hair loss. Since up to 60% of what goes on our skin ends up being absorbed, these chemicals also end up in your liver and kidneys.
- Many anti-dandruff shampoos contain aluminum, a heavy metal which has been implicated in Alzheimer’s but the **Tea Tree Oil** in this shampoo will normalize the pH resulting in no dandruff without dangerous chemicals.
- Because it is so highly concentrated, this sham-

poo is very cost-effective; it can be diluted down to 1:5 with water or activated **Catalyst Water** solution.

- This is the ONLY shampoo/body soap we use in our household; those who try it for themselves think it is better than the most expensive salon product.
- We also use it as an extremely effective wound wash in lieu of *Betadyne*.
- Even in the kitchen for sink dishes and counter-tops, this is a natural and effective cleaner

*NOTE: this shampoo may relax permed hair*

## ALL NATURAL CONDITIONER

- Containing *only* Aloe Vera, Panthenol B Vitamin Jojoba, Precious Vitamin Oils, this is one of the safest and most effective conditioners you can use.
- Put it full strength on the base of an itchy horse’s tail.
- Dilute 1:32 with distilled water and spray on for instant sheen and to reduce static electricity.
- For a body moisturizer, mix about 2:1 with distilled water, add some of your favorite essential oil for good smells and you have a top-notch, safe body moisturizer.
- For those requiring more moisturizing, instead of distilled water, dilute with the **DYNAMITE Tan O’ the Isles** natural oil mixture

*Note: To make both the Shampoo and Conditioner go even farther, use Catalyst Water, mixed according to directions, as the dilution water.*
